Backend	Spring Boot, Spring Security, REST API, Maven, Servlet, JSP, JSF, Hibernate/JPA
Frontend	Angular, HTML5, CSS3, Bootstrap, Swing
Mobile	Android (Java), Flutter
Database	MySQL, Oracle DB, Firebase
Tools	Git, GitHub, VS Code, Android Studio, Eclipse, NetBeans
AI Tools	Claude, Codex, Gemini, Local AI Agents, Antigravity, Cursor Agent, Prompt Engineering, Code Generation, Refactoring, Debugging, Test Generation, Documentation

PROJECTS

E-Governance Management System

Full-stack bilingual (EN/BN) government portal with **25+ integrated modules**, including citizen services, e-voting, e-tender, holding tax, social cards (TCB/VGD/LPG/Farmer), GIS maps, waste management, water supply, health services, digital certificates, and a comprehensive role-based administration dashboard.

E-Commerce Web Application

Full-featured online shopping platform with product catalog, shopping cart, secure checkout, order management, inventory tracking, payment workflow, and JWT-secured role-based authentication.

▣ Smart Event Management System

Enterprise-grade bilingual (EN/BN) event management platform featuring **Admin, Organizer, and Attendee portals**, event approval workflow, online ticket booking, QR code ticketing, PDF ticket & payment receipt generation, venue scheduling, notifications, analytics dashboard, and Android attendee application integrated with Spring Boot REST APIs.

▣ Android Citizen Service App

Native Android application for digital citizen services with secure authentication, REST API integration, Firebase push notifications, profile management, and real-time data synchronization.

▣ Android Event Management App

Native attendee application supporting event discovery, ticket booking, QR ticket wallet, PDF ticket & payment receipt download, profile management, notifications, and secure REST API integration.

▣ Android E-Commerce App

Native e-commerce application featuring product browsing, shopping cart, order tracking, push notifications, user authentication, and real-time synchronization with Spring Boot backend services.

▣ Flutter Mobile Citizen Service Application

Cross-platform citizen service application with responsive UI/UX, multilingual support, secure REST API integration, and real-time access to government digital services.

▣ Flutter E-Commerce Application

Cross-platform e-commerce application featuring product catalog, category browsing, shopping cart, secure checkout, order tracking, user authentication, responsive Material Design UI, and seamless integration with Spring Boot REST APIs.

⌘ SOFT SKILLS

Problem Solving · Critical Thinking · Team Collaboration · Communication · Time Management

🌐 LANGUAGES

Bengali — Native English — Professional Proficiency

☆ INTERESTS

Software Development · Mobile App Development · Technology Learning · Social Work · Traveling · Sports
